Education

Lakeshore State University Expected May 2027

B.S. Information Systems, College of Business *GPA: 3.6*

Relevant Coursework: Database Systems, Business Statistics, Data Visualization, Systems Analysis & Design, Operations Management, Programming in Python, Managerial Accounting, Project Management

Experience

Data Analyst Intern Chicago, IL

Northwind Logistics – Regional Freight Carrier *June 2026 - August 2026*

- Analyzed 14 months of delivery records in SQL to trace late shipments to three under-staffed regional warehouses
- Built a Tableau dashboard tracking on-time delivery rates for 40+ carrier routes, replacing a weekly manual report
- Automated a carrier invoice reconciliation in Python, cutting the monthly close task from six hours to under one

IT Help Desk Technician Chicago, IL

Lakeshore State University *September 2024 - Present*

- Resolved 25+ support tickets a week for students and faculty covering accounts, campus Wi-Fi, and lab software
- Documented 30 recurring fixes in the team knowledge base, which new technicians now use during their training
- Trained 6 newly hired technicians on the ticketing system, escalation policies, and remote troubleshooting steps

Inventory Associate Evanston, IL

Pinecrest Outdoor Supply *May 2025 - August 2025*

- Counted and logged inventory for 2,000+ items each week, flagging any stock discrepancies to the store manager
- Reorganized the stockroom by sales velocity so that the 300 fastest-selling items now sit closest to the sales floor
- Processed online pickup orders during peak weekend hours while keeping the average wait time under ten minutes

Leadership & Involvement

Information Systems Student Association Chicago, IL

Treasurer *August 2025 - Present*

- Managed a $12,000 annual budget across 15 events, reporting all spending to the executive board every month
- Migrated the club's paper reimbursement forms to a shared spreadsheet tracker with live approval status columns

Midwest Analytics Case Competition Chicago, IL

Finalist – 4-Person Team *March 2026*

- Forecast regional demand for a grocery delivery startup from two years of weekly order data in Excel and Python
- Presented a three-city expansion recommendation to a panel of five industry judges, placing 2nd out of 18 teams

University Learning Center Chicago, IL

Peer Tutor – Introduction to Databases *January 2025 - May 2026*

- Tutored 20+ students a semester in introductory database design, SQL queries, and Excel spreadsheet modeling
- Wrote 12 practice problem sets with fully worked solutions that the center now hands out to every new student

Projects

Transit Delay Explorer – Bus Reliability Analysis | *Python, pandas, PostgreSQL, Tableau*

- Cleaned 1.2 million rows of public bus arrival data with pandas and loaded them into a local PostgreSQL database
- Queried delay patterns by route, time of day, and weather to identify the ten least reliable routes in the system
- Visualized the key findings in an interactive Tableau story, then presented it to a campus data journalism seminar

Campus Marketplace – Student Textbook Resale Web App | *JavaScript, React, Node.js, SQLite*

- Developed a web app where students list and search for used textbooks, with listings filtered by course number
- Designed a relational schema of 6 tables covering users, listings, messages, reviews, and saved searches in SQLite
- Launched the app to 150 students in one residence hall and collected their feedback through a short in-app form

Pocket Ledger – Personal Spending Tracker | *Python, Streamlit, Excel*

- Parsed two years of exported bank statements into a single clean ledger, removing duplicate and pending entries
- Categorized 3,400 transactions with keyword rules, then reviewed the 9% unmatched remainder by hand in Excel
- Charted monthly spending by category in a Streamlit page that compares each month's total against a set budget

Skills & Certifications

Data & Analytics: SQL (PostgreSQL, SQLite), Excel (PivotTables, XLOOKUP), Tableau, Statistics, Forecasting
Programming: Python (pandas, Streamlit), JavaScript, React, Node.js, HTML & CSS, Git, REST APIs
Business & Tools: Requirements Gathering, Process Documentation, Budgeting, Jira, Google Workspace
Certifications: Tableau Desktop Specialist (in progress); Microsoft Excel Associate (MO-210)
Languages: English (native), Spanish (conversational)
